DETAILED ACTION

Allowable Subject Matter

1. The prior art of record taken either singly or in combination fails to anticipate or fairly suggest the limitations which the Applicant claims in claim 1 in a manner which would warrant a rejection under 35 U.S.C. § 102 or 35 U.S.C. § 103.

There was no prior art found by the examiner that suggested modification or combination with the cited prior art so as to satisfy the combination of the present independent claim 1; especially, the prior art does not provide a spin-valve transistor characterizing an insulator between the collector and base; wherein the electrical voltage applied between the emitter and the base via the connection means and is greater than the potential barrier of the insulating layer, wherein a collector current is the sum and a tunnel current between the base and the collector means and the ballistic current from the emitter and the collector current has sufficient energy to pass through the base and the Schottky diode without relaxing as recited in claim 1.

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Benjamin T. Liu whose telephone number is (571) 272-6009. The examiner can normally be reached on Mon-Fri 9:30 AM-6:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Sue A. Purvis can be reached on 571 272 1236. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
